

orangeHiL

The compact and modular HiL system.

The compact and modular HiL system.

orangeHiL provides a real-time capable test and simulation environment that is more cost-efficient than comparable solutions. The modular concept makes the system easily expandable and enables a distributed set-up.

orangeHiL can be integrated into any tool chain, and existing simulation models can easily be adapted or integrated. Moreover, **orangeHiL** features interfaces with all common test automation systems.

Cost-efficient solution for component tests

Real-time capable test & simulation environment

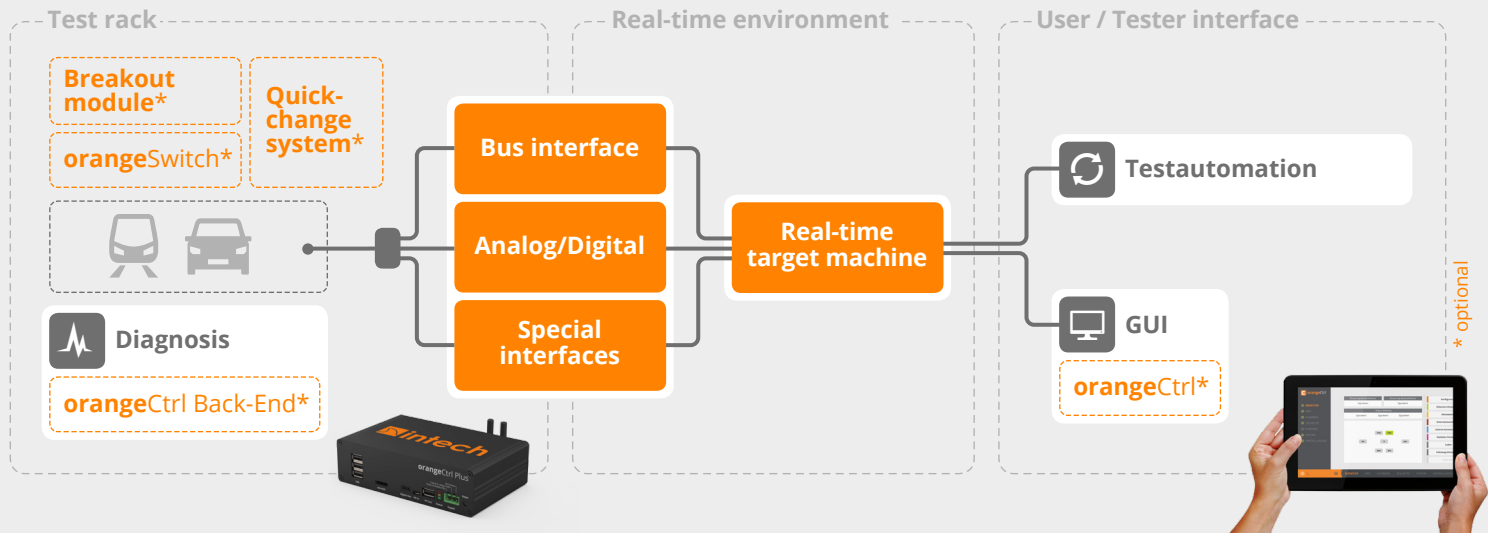

Can be integrated into any tool chain

Modular and allowing distributed set-up
